**I. ABOUT EUROCONSULT**

---

Euroconsult is a leading international consulting firm specialized in the space industry and satellite-based applications and markets. Euroconsult has offices in Paris, Toulouse, Montréal and Washington, DC and has over 600 clients in over 50 countries. Our major institutional clients include the European Commission, the European Space Agency, the European Defense Agency, SatCen, national governments (in Europe and international), space agencies (NASA, CNES, JAXA, etc.), policy think tanks and research institutions, and more. Our major commercial clients include investment banks, satellite operators, service providers, and more.

The Euroconsult business model is based on the complementarity between its three main activities: **consulting** (including due diligence, market analysis, strategic assessments, feasibility studies, government space program analysis and strategic support, socio-economic impact assessments, etc.), **market intelligence services / research** and **organizing international conferences / summits**.

More information available at: [www.euroconsult-ec.com](http://www.euroconsult-ec.com).

**II. THE INTERNSHIP**

---

You will be part of the Space Policy team and provide key support to the team's cross-sectorial tasks and project contributions. Depending on your background and expertise, responsibilities will include:

- Carrying out desk research and analyzing on space-sector topics, ranging from satellite communications, Space Situational Awareness, space economy, launch vehicles, and more
- Quantifying and analyzing government space program budgets and expenditures, which involves working with excel databases and formulas
- Depending on skillset, contributing to consulting missions, covering the following areas: socio-economic impact assessments, space policy and strategy assessments, market assessments, legal / regulatory analysis, technology roadmaps, space industry topics, and more;
- Attending space-related conferences and events and creating briefs (AI, cybersecurity, innovation, R&D, space debris, space situational awareness, drones, 5G, Internet of Things...)
- Other tasks as required by the team

### III. QUALIFICATIONS AND EXPERIENCE

---

- **Education:** Master's Degree in economics, law, public policy, aeronautics, engineering, or related
- **Languages:** Fluency in English is mandatory (spoken and written), a second language (ideally French) would be considered an asset
- **Personal skills:** ability to work in an international and multicultural environment, a self-starter and a team player, respect of corporate values, high commitment to customer service.
- **Space experience and/or interest** is important, and will be discussed during the interview

### IV. TO APPLY

---

Candidates should send their CV and a 1-page motivation letter to [recruitment@euroconsult-ec.com](mailto:recruitment@euroconsult-ec.com) under the reference 2021-SP01 in the subject line.
